

## **JOB POSTING: Agrologist / Registered Technologist in Agrology / CCA**

**Central Alberta Forage and Livestock Association (CAFLA)**

**Location:** Rocky Mountain House (Hybrid office, field, remote)

**Status:** Full-time Permanent

**Start Date:** January 2026 (or sooner if available)

### **About CAFLA**

Central Alberta Forage and Livestock Association (formerly GWFA) is a producer-led non-profit organization supporting practice change, adoption, and applied innovation for forage & livestock producers across Central Alberta. For over 40 years we have been delivering peer-to-peer learning, on-farm demos, applied research, extension events and knowledge mobilization that helps producers make better production, financial and land stewardship decisions.

We're growing and we are seeking a technically strong, practical, producer-focused Agrologist/CCA to join our small dynamic team to support extension programming, field demonstrations, and direct on-farm producer service delivery.

### **Position Summary**

The Agrologist/CCA will work directly with producers, partners, counties, and researchers to advance forage, soil health, grazing management and livestock productivity through applied research, technical extension, and program deployment.

### **Primary Responsibilities**

- Design, implement, monitor and report on CAFLA on-farm demonstration projects (soil, feed, grazing, biologicals, forage systems)
- Provide producer advisory and extension support (email, phone, in-field)
- Conduct soil/forage sampling, interpret lab results, and provide recommendations
- Contribute to The Blade magazine content and extension resources
- Deliver presentations, workshops, webinars and field days
- Support development of resource tools and knowledge hubs (soil, livestock, crop)
- Build collaborative relationships with industry partners, experts and research scientists

### **Qualifications**

- PAg OR AAg candidate OR CCA (required: eligible / in-process)
- Diploma or Degree in Agriculture, Plant Science, Animal Science, Ag Business, Soil / Environmental Science or equivalent experience
- Experience working with producers (forage, beef or mixed systems strongly preferred)
- Understanding of soil health principles, regenerative grazing concepts, feed quality, forage systems, forage agronomy, on farm economics and ROI
- Valid Class 5 license and willingness to travel regionally
- Experience safely operating equipment such as trailers and side by side.
- Experience with trial design, monitoring, data handling an asset

**Attributes**

- Producer-first approach
- Problem solver, self-starter
- Strong communicator and relationship builder
- Curious, open-minded, technical and practical

**Compensation + Benefits**

- Starting annual salary: \$65,000  
(based on PAg/CCA status + experience level)
- Access to company vehicle for business related travel
- Professional development and designation support
- Paid time off / Christmas closure
- Health benefits

**How to Apply**
